

Rig wash detergent is a blend of selected anionic and non-ionic surfactants with a variety of uses ranging from general rig and engine clean up to specialized cutting wash solutions for oil muds.

Rig wash can be applied by pressure wash, sponge, brush or cloth to any grease and oil collecting surfaces and rinsed clean. Phosphate free formulation contains no caustic, is not flammable and emits no harsh odors making it safe to use and versatile.

Typical Physical Properties

CHARACTERISTIC	STANDARD	Test Method
Physical appearance	Clear liquid	----
pH (5% solution)	6-7	ASTM D-1172
Sp.Gr @25 °C (g/ml)	1 ± 0.02	ASTM D-1298
Viscosity @ 25 °C (Cps)	< 60 Cps	ASTM D-445
Boiling Point (°C)	≈ 100	----
Solubility in Water	Completely Soluble	----

Applications

- **Rig wash** is power detergent for cleaning offshore and drilling rigs.
- **Rig wash** properly maintain expensive machinery and get the highest level of productivity and efficiency from them.
- **Rig wash** is effective cleaner in hot and cold water
- **Rig wash** clean rigs and a wide variety of other industrial equipment and assets.

Recommended Treatment

Use **Rig wash** as part of a manual, steam, or high-pressure application in hard or soft water. Scour or brush stubborn deposits prior to application. Apply full strength to remove thick deposits of oil and grease, varnish, floor wax, and to wash rig floor and equipment. High pressure hot water is recommended to clean mechanical parts.

Advantages

Technical Data Sheet

ICC- Rig Wash, Clean Up

- Cleans rig floors and equipment
- Degreases shop floors
- Disperses in petroleum-based fluids and solubilizes in water
- Environmentally friendly
- Phosphate free Formulation
- Non toxic
- No harsh Odors or foams
- Non flammable

Packing and Storage

Rig wash is packaged in 220 Li (Net) steel drums. Customized packaging is also available on request. Keep away from heat, sparks and open flames. Keep containers closed.

Shelf Life

Rig wash has shelf life of at least one year from the data of manufacture when stored in the original sealed containers in a cool and dry place.

Safety and Handling

Rig wash is among the safest products. This product is a stable material and may be stored for over 1 year. Do not take internally. Keep away from eyes, skin and clothing. Normal precautions in handling organic chemicals should be observed.
